Radorama Report 2007/2008

Anche quest'anno siamo arrivati al tradizionale appuntamento di agosto, che vede la rielaborazione degli ascolti degli ultimi undici mesi. E' il risultato del nostro lavoro di indagine, finalizzato all'individuazione e al riconoscimento (ID) delle stazioni di radiodiffusione. E' una disciplina difficile, che richiede impegno assiduo e molta costanza: gli ascolti sono trascritti nel log di stazione, i dati si completano consultando varia documentazione al fine di conoscere la località di trasmissione, ovvero il sito in cui è posizionato il trasmettitore. Tipici sono il *World Radio TV Handbook*, il *Passport to World Band Radio*, altre liste disponibili in internet e ... anche le ultime edizioni del **Radorama Report!**

L'archivio unico comprende tutti gli ascolti pubblicati da settembre 2007 a luglio 2008, sono circa 5000 righe (19 in DRM).

Quasi metà dell'archivio è dovuta alla collaborazione di Franco Baroni, Giancarlo Ceccarelli e Roberto Martini. Un quarto è costituito dagli ascolti DX effettuati nel corso delle spedizioni a Piancada UD (laguna friulana).

Il numero di collaboratori è in calo.

In questo **Report 2007/2008** vengono omessi una ventina di ascolti dubbi (quelli che avevano "c" nel campo dettagli, elencati mensilmente nella sezione "Richiedono approfondimento"), gli ascolti della sezione "Pirate" (268), e circa 130 ascolti tra "non identificata" e altri cui non è stato possibile attribuire il valore ITU.

Si noti che i Paesi sono elencati nell'ordine alfabetico del nome esteso e che l'ordinamento è ricavato per frequenza e orario.

Tutti gli ascolti sono archiviati nella forma standard di "Scala Parlante", usando il programma RRMALN di Sergio Sessa in ambiente MS-DOS oppure con il software LOGRRGC di Giorgio Casu in ambiente Windows. Alcuni collaboratori usano programmi commerciali come Excel, Word o data base di altro tipo.

Nei dettagli le ricorrenze "It." (= in lingua italiana) sono 318, erano 607 l'anno scorso. Gli "ID" (= identificazione dell'emittente) sono 2297.

Ringrazio tutti i collaboratori che con le loro attente osservazioni hanno contribuito a realizzare quest'opera unica nel suo genere. Devo aggiungere che è auspicabile che tutti gli ascoltatori tengano il quaderno di stazione; resto a disposizione di quanti volessero prove dimostrative dell'uso del software per log di stazione su PC in occasione delle riunioni periodiche.

Le novità di questa edizione.

L'intervento di integrazione è stato seguito da queste operazioni:

- corretti molti errori di battuta
- normalizzati alcuni nomi (Adhra, Cërrik, Fllaka, Iranawila, Son Tay, Sulaibiyah, Talata Volonondry, Udon Thani, Yangiyul, Zygi)
- corretti alcuni valori ITU (CLN al posto di SLK)

Sono elencati trasmettitori (ovvero siti di trasmissione) da 143 Paesi diversi.

- invariato l'elenco delle abbreviazioni a pag. 3.
- invariata la tabella dei codici dei Paesi (ITU e non ufficiali) a pagina 4.
- aggiornato l'elenco degli indirizzi nelle pagine finali (a cura di Bruno Pecolatto)

L'edizione su file sarà classificata in diversi archivi in base al periodo di trasmissione:

A aprile/ottobre - **B** novembre/marzo

FREQUENZE

Modo d'uso

Sono elencate tutte le frequenze segnalate (valore intero). In corrispondenza della frequenza si trova l'abbreviazione del Paese. Con il valore ITU si va all'elenco delle abbreviazioni nella pag. 4 - qui accanto - e si ricava il nome esteso del Paese. Passare poi alla sezione degli ascolti (a partire da pag. 8) e cercare quel Paese per risalire all'orario delle segnalazioni.
